

Sales Performance & Profitability Dashboard

Business Insights Report | Superstore Dataset | 2011–2014

KEY PERFORMANCE INDICATORS

Total Revenue \$2,297,201	Total Profit \$286,397	Average Profit Margin 12.03%	Total Orders 5,009
-------------------------------------	----------------------------------	--	------------------------------

KEY INSIGHTS

West region leads in both sales and profitability

- West generated \$725,458 (31.6% of total revenue) with the highest profit margin of 14.9%, the strongest performing region across all four years.

Technology drives the highest profit margin

- Technology contributes \$145,455 in profit at a 17.4% margin making it the most valuable category despite Furniture and Office Supplies having similar sales volumes.

Furniture sub-categories are running at a net loss

- Tables (-\$17,725) and Bookcases (-\$3,473) are loss-making sub-categories. Furniture overall achieves only a 2.5% profit margin the lowest of all categories.

Central region underperforms despite decent sales volume

- Central has only a 7.9% profit margin the lowest of all regions despite being 3rd highest in total sales. This signals excessive discounting or poor pricing strategy.

Consistent year-over-year revenue growth

- Revenue grew from \$484,248 in 2011 to \$733,947 in 2014, a 51.6% increase over four years demonstrating strong and consistent business momentum.

Q4 is the peak sales season

- November (\$349,120) and December (\$332,177) are the top two months, accounting for nearly 30% of annual revenue. Seasonal demand peaks every Q4 without exception.

BUSINESS RECOMMENDATIONS

1

Invest more in the Technology category

Technology delivers 17.4% margins and \$145K in profit. Increase marketing spend, expand the product range, and prioritise Technology inventory to maximise profitability.

2

Fix or discontinue Tables and Bookcases

Tables are losing \$17,725 annually. Review supplier contracts, raise selling prices, or remove these SKUs entirely to stop the revenue drain in the Furniture category.

3

Investigate and fix Central region discount practices

A 7.9% margin in Central strongly indicates excessive discounting. Audit sales rep discount policies and enforce a minimum margin floor of 10% on all Central region deals.

4

Plan Q4 inventory and staffing in advance

November and December drive ~30% of total annual sales. Begin inventory procurement in September and increase staffing in October to avoid stockouts during peak demand.

5

Replicate the West region strategy across the South

West achieves a 14.9% margin the highest across all regions. Study what drives this performance (pricing, product mix, discount discipline) and apply those practices in the South region.
